SUMMARY

Java Backend Developer with expertise in Java, Spring Boot, and React. Experienced in building AI-powered applications using Spring AI, RAG, and Groq LLM, along with scalable REST APIs, JWT Authentication, Docker, and CI/CD. Strong foundation in DSA, OOPs, and DBMS.

TECHNICAL SKILLS

Languages: Java, SQL

Core: DSA, OOPs, DBMS, MVC, SOLID

Frameworks: Spring Boot, Spring Security, Hibernate/JPA, React.js, Spring AI

AI: RAG, Agentic AI, LLM Integration, Prompt Engineering, AST Parsing

Databases: MySQL, PostgreSQL, Neo4j, pgvector

Tools: Git, GitHub Actions, Docker, Linux, Swagger, Jira

INTERNSHIP

Java Developer Intern

Sep 2025 – Feb 2026

CoderVu InfoTech, Indore, MP

- Built scalable backend services with **Spring Boot** and **Hibernate**; optimized **MySQL** performance via indexing, achieving 40% faster queries.
- Designed **RESTful APIs** with comprehensive documentation for seamless frontend integration.
- Containerized deployments with **Docker** and automated CI/CD via **GitHub Actions**.
- Leveraged **Spring AI** to integrate multiple **LLM providers** with robust error handling and fallback mechanisms.
- Secured applications using **JWT authentication** and **Spring Security**.

PROJECTS

AI Legacy Bridge – AI-Powered Legacy Code Intelligence Platform

Java 21, Spring Boot, React, Spring AI, PostgreSQL, pgvector, Neo4j, Groq LLM, D3.js, Docker

- Built an AI-powered legacy code intelligence platform combining a **Visualization Explorer** and an IDE-style **AI Explorer** for repository-aware code understanding across large multi-language codebases.
- Developed AST-based repository analysis to generate dependency graphs, architecture visualization, code metrics, dead-code detection, security insights, and repository analytics.
- Designed a unified repository ingestion pipeline supporting **GitHub repositories, local folders, and ZIP archives**, extracting source code, dependency graphs, architecture metadata, embeddings, and function relationships into a structured knowledge model.
- Engineered an IDE-like **AI Explorer** with a resizable project tree, repository-aware AI chat, contextual node navigation, code editor, and seamless workspace switching.
- Implemented an **Agentic RAG** architecture using **Spring AI, Groq Llama 3.3 70B, Neo4j, and pgvector**, enabling repository-aware code explanation, documentation, testing, refactoring, optimization, security review, and migration assistance.

CultivationX – AI-Powered Developer Career Growth Platform

[Live Demo](#)

Java, Spring Boot, React, Spring AI, Docker, CI/CD

- Built a full-stack AI platform integrating resume analysis, AI mentoring, and GitHub/LeetCode data for personalized career guidance.
- Architected a modular **Spring Boot 3.5** application with five feature modules: Rise, Mentor, Nexus, DevDNA, and Dashboard.
- Developed AI-powered resume parsing, ATS scoring, conversational coding assistance, automated code review, and personalized learning roadmaps using **Spring AI** and **Groq LLM**.
- Integrated GitHub OAuth and LeetCode GraphQL APIs with scheduled synchronization to compute developer activity and performance insights.
- Built the **LeetGit** pipeline to AI-review LeetCode submissions and automatically publish optimized solutions with interview notes to GitHub.

EDUCATION

B.Tech in Computer Science Engineering

Sep 2021 – June 2025

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore, MP
