SUMMARY

Software Engineer specializing in Java, Spring Boot, and React, with hands-on experience building AI-integrated backend systems using Spring AI and LLM APIs (Groq). Skilled in designing scalable REST APIs, secure authentication (JWT), and containerized deployments (Docker, GitHub Actions CI/CD). Strong foundation in Data Structures & Algorithms, OOPs, and DBMS.

SKILLS

Languages: Java, SQL

Backend: Spring Boot, Microservices, JWT Authentication, Spring AI

Frontend: React.js, HTML5, CSS3, Bootstrap

Databases: MySQL

Tools & DevOps: Jira, Git/GitHub, GitHub Actions (CI/CD), Docker, Linux OS

Core Concepts: Data Structures & Algorithms (DSA), OOPs, DBMS, MVC Architecture, Agile Methodology

INTERNSHIP

Java Developer Intern

Sep 2025 – Feb 2026

CoderVu InfoTech, Indore, MP

- Built scalable backend services with **Spring Boot** and **Hibernate**; optimized **MySQL** performance via indexing, achieving 40% faster queries.
- Designed **RESTful APIs** with comprehensive documentation for seamless frontend integration.
- Containerized deployments with **Docker** and automated CI/CD via **GitHub Actions**.
- Leveraged **Spring AI** to integrate multiple **LLM providers** with robust error handling and fallback mechanisms.
- Secured applications using **JWT authentication** and **Spring Security**.

PROJECTS

CultivationX – AI-Powered Developer Career Growth Platform

[Live Demo](#) | [Github Link](#)

Spring Boot, React, Spring AI, Docker, CI/CD

- Built a full-stack AI platform unifying resume analysis, AI code mentoring, and GitHub/LeetCode integration to deliver personalized career-readiness insights.
- Architected a modular **Spring Boot 3.5** monolith with 5 feature modules (Rise, Mentor, Nexus, DevDNA, Dashboard), each solving a distinct part of a developer's job-readiness journey.
- Built **Rise**, an AI resume parser and ATS scorer using Apache Tika/PDFBox and Spring AI, extracting skills and generating personalized learning roadmaps via the Groq LLM.
- Built **Mentor**, an AI coding assistant with conversational memory, automated code review (correctness, performance, security scoring), and optimized-solution generation.
- Built **Nexus**, integrating GitHub OAuth and LeetCode GraphQL APIs with a scheduled sync engine to track developer activity and compute composite developer scores.
- Developed the **LeetGit** pipeline within Nexus that AI-reviews LeetCode submissions and auto-pushes formatted solutions with complexity analysis and interview notes to GitHub.

HRMS Portal – Full-Stack HR Management System

| [Github Link](#)

Spring Boot, React, MySQL, JWT

- Developed an end-to-end Human Resource Management System with multi-role access control (Admin, HR, Employee) for managing employee data, attendance, and payroll.
- Implemented **JWT-based authentication** and **role-based access control (RBAC)** to secure sensitive employee data across all modules.
- Containerized backend services using **Docker**, ensuring consistent, reproducible deployments across environments.
- Automated attendance tracking and payroll calculation workflows, eliminating manual, error-prone HR record-keeping.

EDUCATION

B.Tech in Computer Science Engineering

Sep 2021 – June 2025

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore, MP
